

Recipient of Florida Chapter's Scholarship

Andrew Howard

“Only in the Dictionary does success come before work”.

My tenure at Camperdown High School began in the year 2007. Based on the Grade 9 Achievement Test results, I was placed in the Grade 9D class, where I enjoyed it for most of the term. In the first term I was placed first out of twenty (20) students.

On the other hand, life was not treating my family well in the area of financial support. I often went to school with only bus fare and in the evenings I was not certain if I was going to enjoy any meal.

Despite that, I try to focus on my achievements and not my disadvantages. Moreover, I always maintain a theme in my head which reminds me that, “Only in the Dictionary does success come before work”. In order to aid in my success I always keep this in mind.

Remembering this theme has helped to pave my way to success. I have seven (7) CXC subjects, with passes in the following:

**Caribbean History III
Chemistry III
English A III
Mathematics II
Physics II
Spanish III
Principles of Accounts III**

Passing these subjects have helped me to be motivated and has reminded me that between hard times lies success, which has been proven.

I am now in Grade 12 (Lower Sixth Form), where I am pursuing Mechanical Engineering. My current subjects are Physics, Mathematics and Communication Studies.
